

## How to Install Maurice Ashley Teaches Chess

(If double clicking on Setup.exe fails to install the program.)

Setup.exe will NOT install the program under 64 bit Windows or Vista.

To install manually: Copy the contents of the Match folder on the CDROM by dragging it to the root directory of the C:\ drive. (C:\Match)

Find the MATCH.EXE executable file in the newly copied folder, and right click to create a shortcut on your desktop. Choose Send to Desktop (create shortcut).

In 64 bit Windows 7 the program runs without adjusting compatibility settings, although it runs in a window on my HD monitor.

Right click on the desktop shortcut, select properties, then the compatibility tab if you would like to run the program in XP mode, 256 color @ 640 x 480 resolution.

You must have the CDROM in the drive for the program to run. Double click on the program short cut you created to start the program.

Enjoy!
